

CARE PROGRAMME

WHEN IS IT?

CARE is a learning and development programme that empowers primary care professionals to play a key role in their primary care network, to shape services based on population health needs and to strengthen their leadership. Focussing on wellbeing and building and harnessing resilience, the programme uses digital technology to connect primary care professionals and to support joined-up, multi-professional working.

CARE's practical and person-centered approach has already led to more joined-up working in primary care networks, bringing together a range of health and social care professionals as a complete care community.

System Leaders

driving large scale change and inspiring others to do the same

Thought Leaders

driving innovation and learning through evaluation and sharing best practice

Super-connectors

across Primary Care for the benefits of the workforce and patients
