

GPA PROGRAMME

WHAT IS A GPA?

The General Practice Assistant (GPA) is now an established national role and has been developed to relieve the clinical admin burden on GPs.

WHY BECOME A GPA?

Funding of £2,120 per applicant is available for your practice to support learners.

The programme only takes 6 months to complete and will give the GPA chance of further career progression, and develop a broad understanding of General Practice.

The GPA can support doctors in the smooth running of their practice to enable the doctor to focus more on the patient, improving the patient journey.
