

T2DAY: Type 2 Diabetes In The Young

Achieve high impact intervention through completion of the 9 key care processes.

Type 2 Diabetes In The Young (Ages 18-39): Training

Aim: Reducing inequalities in care for younger adults with type 2 diabetes

Who should attend? Anyone who provides care for people with type 2 diabetes.

Why attend? We have the potential to improve outcomes for this high risk patient cohort with relatively small changes to practice.
