

Introduction to Clinical Supervision

This is a fully funded face to face half day introductory course that will equip attendees with basic skills and knowledge to provide clinical supervision within the workplace.

This course is intended for clinicians working in primary and community care environments from the wider workforce professions and GPs who wish to explore how to support their staff better. It is aimed at those individuals in General Practice who have recently been asked to supervise staff and/or would like some fundamentals around the below elements of supervision.

The aims of the course are:

- **To explore clinical supervision, its role and its function**
- **To explore some different models of clinical supervision and their application in practice**
- **To understand how reflective questions can support clinical supervision**
- **To understand accountabilities and responsibilities of the clinical supervisor and the supervisee**
- **Tips for implementing clinical supervision in an organisation**

To book onto the course, you will need to register for an account on Maxcourse
